Research Interests

I'm interested in Machine Learning, Computer vision, and their applications towards more Human-centric and Humanoid AI. My current research focuses include:

1) **Causal Explainable AI** : (1) Understanding reasoning logic and causality of Neural Networks (NN) (2) Use explanation as feedback to help improve the performance of the original NN.

2) **Interpretable human-AI interaction** : understanding AI models beyond accuracy, such as disentangled representation learning, human-NN knowledge exchange, steerability, generalization, fairness, and bias.

3) **Humanoid Neural Network**: simulating human cognitive ability (Imagination, Reasoning, Visual Recognition) by using various learning algorithms (Generative models, Representation Learning, Graph Neural Network, Contrastive Learning, etc.).

4) **Effortless AI**: how generative models reduce human effort and boost discriminative models.
